

ABSTRACT OF THE DISCLOSURE

1 A method for increasing the bearing capacity of foundation soils
2 for ~~buildings~~ ^{built structures} consisting ~~in~~ ^{of} providing a plurality of holes spaced from each
3 other deep in the soil, and ~~in~~ injecting into the soil, through the holes, a
4 substance which expands as a consequence of a chemical reaction, with a
5 potential increase in volume of at least five times the volume of the
6 substance before expansion. ~~The~~ ^{produces} expansion of the substance injected into
7 the soil ~~producing~~ compaction of the contiguous soil.
